

Adam Koza
Project 2 Report

Project 2 was a little more troublesome for my group than the last project. Jackson and Ben were able to get their parts done on time, but Sean and I were still running into bugs by midnight the night the project was due. Sean and I should be the only ones to receive a late grade, because the our parts were what held us back.

This project, I implemented:

```
public SortedMap <K,V> headMap (K toKey)
public SortedMap <K,V> tailMap (K fromKey)
public SortedMap <K,V> subMap (K fromKey, K toKey)
private void insert (K key, V ref, Node n, Node p)
private Node split (K key, V ref, Node n)
```

The SortedMap method implementations went smoothly, but I had trouble with the insert and split methods.

Name	Grade
Adam Koza	
Ben Pipkin	+5
Sean Sandlin	+5
Jackson Wearn	+5

Meetings:

Tuesday February 3rd from 4:00pm-6:00pm
